Front Firing Light Mounts

- * Front light mounts allow for maximum forward facing light output while in pursuit
- * Mounted to OEM BMW extensions allowing no mounting holes to be drilled
- * Metal mount is designed to allow almost any brand of light to be mounted on it.
- * Epoxy coated for durability

Front Fairing Light Pods

- * Angled front fairing light mounts allow for 360* off axis viewing
- * Can also be mounted to allow for a true intersection clearing light and forward facing light
- * Pod is designed to allow almost any brand of light to be mounted on it.
- * Made from heavy duty ABS construction
- * Vacuum formed for durability

Rear Light Pod

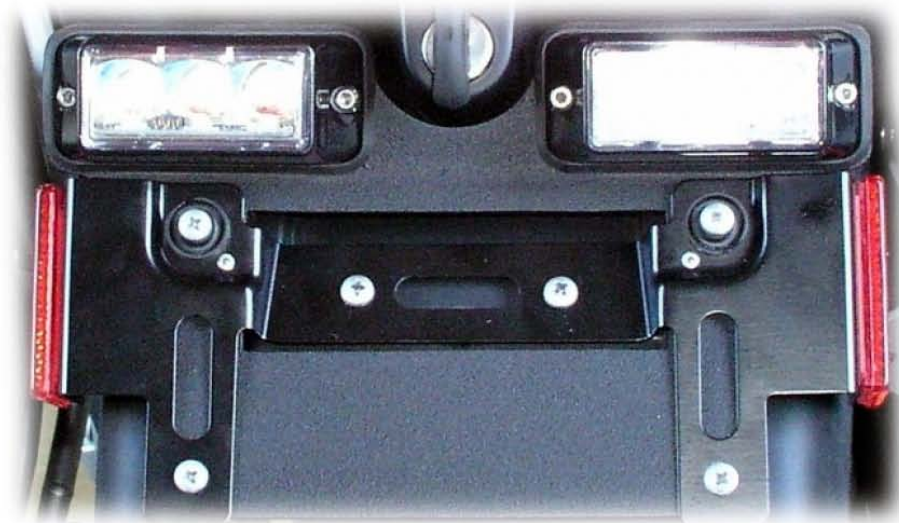

- * Angled side panel light mounts allow for 360* off axis viewing
- * Rear pod mounted to the bike, not the radio box. Allowing for full light coverage even if the radio box is open
- * Pod is designed to allow almost any brand of light to be mounted on it.
- * Mounts using factory fasteners (no hole drilled)
- * Vacuum formed heavy duty ABS construction

License Plate Light Pod

- * License plate pod mounted to the bike allowing for full light coverage with out blocking the license plate
- * Pod is designed to allow almost any brand of light to be mounted on it.
- * Mounts using factory license plate fasteners (no hole drilled)
- * Made from heavy duty ABS construction
